Accent is a white, Rear-Projection Film with a high level of light transmittance. Accent produces very bright, crisp images in any lighting environment. Accent requires no specific projection angle and can be used with standard, short, and long-throw projector lenses. When used in direct sunlight applications, we recommend adding SSI Anti-Glare Film for better image visibility.

In turn, images seen through tinted glass are not only possible, but bright and clear due to Accent’s light transmittant properties. Accent is available in large, seamless sizes - up to 120” diagonally and in a choice of either 4:3 or 16:9 aspect ratio. From retail environments to corporate settings, the Accent Rear-Projection Film has an indefinite capacity for use and application - limited only by your imagination!

### Common Applications for Accent Film
- Retail Windows
- Applications Using Low-Lumen Projectors
- Lobbies
- Museums
- Kiosks
